---

Hello Dana,

Thanks for sending this draft by us and the heads up. I read through your letter and don't have any concerns- I think it well reflects our discussions to date. I'll run it by the rest of the team (showstopper review only) and let you know if anything changes by Monday.

Much appreciated and have a good weekend!

S

Subject: River Mile 4-7 Group, DEQ Reply to 2/2/17 Letter

Good morning Sean.

The RM 4-7 Group sent DEQ a letter in early February following up on the meeting held with EPA last November. We've finalized a draft reply that I've attached along with a copy of the RM 4-7 Group letter.

The primary purpose of our letter is to clarify information the group presented during last November's meeting that they reiterated in their February letter regarding stormwater source control and active DNAPL migration to the river. We're also making it clear we consider historic direct discharge(s) of MGP materials is the primary source of contamination in river sediment offshore of the Gasco site.

These are essentially the same issues DEQ discussed with EPA during the November 15th meeting that followed the meeting with the RM 4-7 Group.

Although its intended to give you a heads up, if you do have concerns I'd appreciate you getting back to me Monday. I'm planning on sending our reply to the RM 4-7 Group as early next week as I can.

Thanks much and if you have questions or need to discuss the attachments today, feel free to call my cell at 503-201-1209.

Hope you have a good weekend.

Dana
